**django.contrib.humanize** ¶

A set of Django template filters useful for adding a “human touch” to data.

To activate these filters, add '`django.contrib.humanize`' to your `INSTALLED_APPS` setting. Once you've done that, use `{% load humanize %}` in a template, and you'll have access to the following filters.

**apnumber** ¶

For numbers 1-9, returns the number spelled out. Otherwise, returns the number. This follows Associated Press style.

Examples:

- `1` becomes `one`.
- `2` becomes `two`.
- `10` becomes `ten`.

You can pass in either an integer or a string representation of an integer.

# django-crispy-forms

django-crispy-forms provides you with a crispy filter and {% crispy %} tag that will let you control the rendering behavior of your Django forms in a very elegant and DRY way.

The screenshot shows the GitHub repository page for "django-crispy-forms". The repository is public and has 1,773 commits. It features 8 branches and 46 tags. The repository has a 4.9k star rating, 117 watchers, 740 forks, and a 4.9k issue count. The repository is maintained by "smithdc1" and last updated 3 months ago. The codebase includes files like .github, crispy\_forms, docs, requirements, tests, .editorconfig, .gitignore, .pre-commit-config.yaml, .readthedocs.yaml, CHANGELOG.md, CONTRIBUTORS.txt, and LICENSE.txt. The repository is described as "The best way to have DRY Django forms. The app provides a tag and filter that lets you quickly render forms in a div format while providing an enormous amount of capability to configure and control the rendered HTML." It links to [django-crispy-forms.rtfd.org](https://django-crispy-forms.rtfd.org). The repository has 23 releases, with the latest being version 2.1, released on Oct 15, 2023.

# django-mathfilters

django-mathfilters provides a set of simple math filters for Django.

The screenshot shows the GitHub repository page for `django-mathfilters`. The repository is public and has 9 watchers, 26 forks, and 168 stars. It contains 1 branch and 8 tags. The master branch has 61 commits. The repository description states: "django-mathfilters provides a set of simple math filters for Django." It includes links to Readme, MIT license, Activity, 168 stars, 9 watching, 26 forks, and a Report repository button. The Octotree sidebar is visible on the left.

# django-compressor

Django Compressor is a tool for compressing CSS and JavaScript files in Django templates. It helps optimize the loading speed of web pages by reducing the size of static files.

The screenshot shows the GitHub repository page for 'django-compressor'. At the top, there's a header with the repository name, a 'Public' button, and social sharing icons. Below the header, there are buttons for 'develop', '13 Branches', '50 Tags', 'Watch 50', 'Fork 598', 'Star 2.7k', and a 'Code' dropdown. On the left, there's a sidebar labeled 'Octotree' with a tree icon. The main area displays a list of commits from 'cclaus' in reverse chronological order. Each commit includes the author, message, date, and a link to the pull request or commit details. To the right of the commit list, there are sections for 'About', 'Releases', and 'Contributors'. The 'About' section describes the tool as compressing linked and inline javascript or CSS into a single cached file. The 'Releases' section shows 50 tags. The 'Contributors' section lists 207 contributors with small profile pictures.

# django-countries

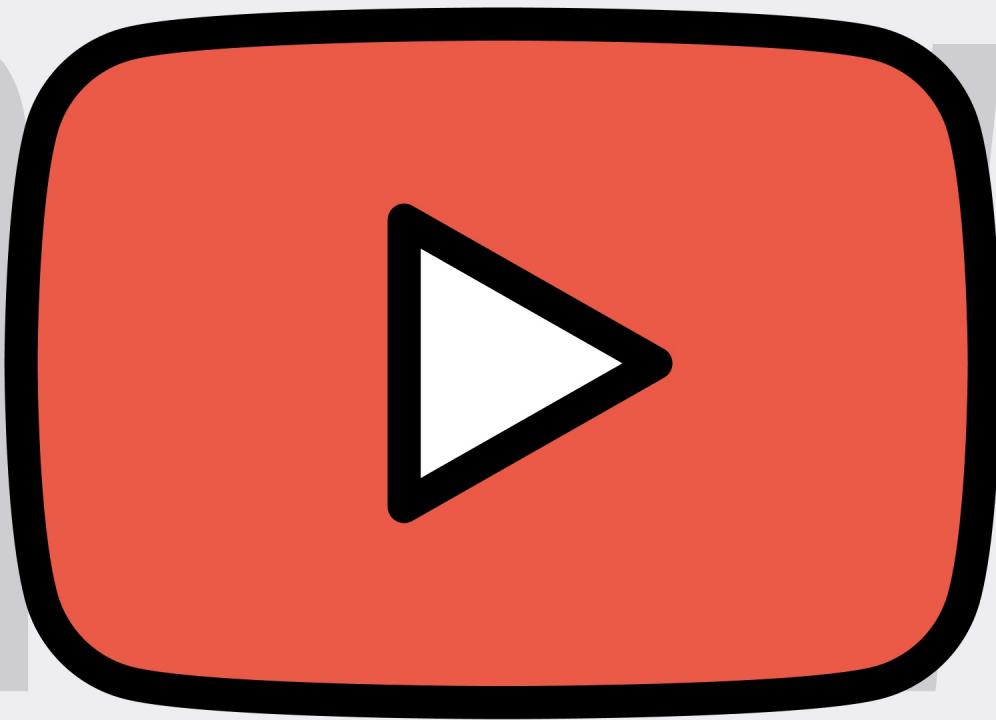

A Django application that provides country choices for use with forms, flag icons static files, and a country field for models.

The screenshot shows the GitHub repository page for "django-countries". The repository is public and has 21 watchers, 279 forks, and 1.3k stars. It features 1 branch and 56 tags. The repository description states: "A Django application that provides country choices for use with forms, flag icons static files, and a country field for models." It includes links to PyPI and GitHub activity, and a contributors section with 50 contributors. The repository tree shows files like .github/workflows, .tx, django\_countries, .gitignore, .isort.cfg, .pre-commit-config.yaml, CHANGES.rst, LICENSE, MANIFEST.in, README.rst, pyproject.toml, and setup.cfg, along with various commit logs from SmileyChris and PabloCastellano.

These are just a few  
examples of packages that  
can enhance or extend  
Django's template  
capabilities.
